

ADULT / BUSINESS / SPORTS

Our adult customers using a Guardian Angel™ International GPS tracking device enable complete independence and total reassurance and meets requirements relating to data protection and privacy. We use latest technology and mapping software such as Google Earth™ or to a mobile phone or to a bodyguard. We offer managed services for organisations that need company specific tracking solutions notably lone workers solutions. The tracker will track within 15 feet (5metres) in real-time updates and 2, 4 or 8 hour last position notification update or SOS only supported with 24/7 helpdesk. The device has global usage and enables adult independence and assurance using SOS functionality. **Matchbox size**, it can be covert or designed into clothing. Businessmen, Gap Year students, professional sportsmen, celebrities and international travellers have a 24/7 dedicated international SOS helpdesk to support them when they travel globally.

A dedicated SOS support mechanism is in place to support the tracking device:

- A SOS Panic Button which can be configured to alert 3 key personal “My Best Friend” mobile phone numbers.
- A local UK based 24/7 Helpdesk which will receive SOS messaging and last known position.
- A global based 24/7 Helpdesk which will co-ordinate local helpdesk “International Rescue” for Roaming Customers.

Guardian Angel International is the world leader in global GPS tracking and monitoring devices. We cover personal protection for children, adults, disabled, and the elderly. We track personal assets, vehicles, yachts, high value assets and plant equipment. Our tracking devices are used for pets, and special animals. We research and develop our products through quality assurance, customer feedback and our own 24/7 helpdesk which leads to better design and functionality for our customers.
